WingFan is the most innovative manufacturer of modular axial impellers and its name is synonymous worldwide with reliability and high quality.

For over 60 years customers have trusted WingFan to deliver up to date solutions.

WingFan solutions – silent and efficient !

WingFan offers you a wide range of Axial fans with a diameter from 203 mm (8") to 1.982 mm (78") in nylon, aluminum and antistatic material.

Our sophisticated modular system of flexible combinable components consisting of blades with different pitch angles, hubs sizes and mounting options allows us to custom engineer our fans to your specific application.

Blades are available in glassfibre reinforced, lightweight Nylon (PA or PAG) or Aluminum. For use in explosive environments we offer antistatic carbon fibre reinforced Nylon (PACAS), only available from WingFan.

We will continue to apply our know how to develop solutions for ever increasing customer expectations.
